

The US Lacrosse learning management system (LMS) is capable of being displayed on a multitude of devices we do not have any specific system requirements. Our learner interface runs great on screens of all sizes (desktop / tablet / mobile phones), but we recommend that you limit your use to desktops/laptops or tablets.

Here is a list of officially supported browsers compatible:

Chrome (Desktop / Tablet / Mobile)

Internet Explorer (Desktop / Tablet / Mobile)

Firefox (Desktop)

Safari (Desktop / Tablet / Mobile)

Android (Tablet / Mobile)

**With the exception of Internet Explorer, only the most recent versions of each browser will be officially supported by the LMS.

Keep in mind that your individual course content may have additional requirements above and beyond the browser (e.g. if you are still using Flash based courses in the learner interface then learners will need to have Flash installed)
